Introduction

The Profit + Point of Sale (POS) system can have a dramatic effect on your retail business, giving you a new level of control over your operations, increasing efficiency, boosting profits, and helping you fine-tune your business model. In addition to being more efficient than regular cash registers.

Profit + can create detailed reports that can help you make more informed business decisions.

Benefits:

Save money:

Cut down on shrinkage - inventory that disappears due to theft, waste, and misuse
Ensure that every item sells for the correct price, and Generate detailed sales reports to focus on higher-margin items.

More information:

How many of a particular product have sold today, last week, or last month.
How much money in the cash drawer, and
How much of that money is profit
Collect the names and addresses of certain Customers.

Increase productivity:

Less time doing inventory/sales figures

Note: The benefits require a commitment to utilize Profit + capabilities to its fullest with proper training and ongoing analysis.

Profit + system handles standard customer transactions:

Displays items and prices
Handles taxes, returns, voids, payments, Discounts.
